Do not be misled by the political wire-pullers. If you are doing the right thing, you are doing the right thing. Tell the Commission, says, as to the new registration, paragraph 2. The same rules, regulations and statutory provisions will govern for the new registration as in case of the old or regular registration." The latter, in article 3, in the ruling of the commission, provides that "it shall also be the duty of each registrar, in person or by deputy,

during the work commencing the 1st Monday in September of each year, at his office, to enter on his register that may have been omitted, or such voter appearing and complying with the provisions, which are, according to the 13th article. This is not for the present election but for the next, and for the constitutional election. If this is not a correct interpretation of the law, and the committee please set us right on the matter, as it is of importance? A full registration should be had and it is easier for political tricksters to endeavor to prevent it, as it appears.
